

The Berkeley window and door system is an ideal solution for historic projects where minimum sightlines, maximum daylight, and fine detail are desired. Hot rolled profiles feature an external solid steel chamfer that replicates traditional putty glazing in combination with internal beading that offers security and access for re-glazing.

Features and Benefits

- Unique chamfered profile. British Registered Design
- Solid steel chamfer that replicates a putty glazing exterior. Ideal for heritage and planning sensitive projects
- Hot-dip galvanised. 60 year plus life expectancy
- In-house, factory applied Duralife® polyester powder coating
- Integrated, high-performance EPDM weatherseals
- Thermally efficient. Part L compliant
- Traditional hardware designed for heritage projects

Quick View

Material	Steel, hot rolled
Glass Thickness	19mm / 3/4" double glazing
Suitability	Heritage
Finish	Full range of RAL/BS colours
Air Permeability	Up to 300 Pa / 6.24 PSF
Water Tightness	Up to 300 Pa / 6.24 PSF
Wind Resistance	Up to 2000 Pa / 42 PSF
Quality Management	ISO 9001
Environmental Management	ISO 14001
